

Married TO BUSINESS

How do you work together in small spaces?
Here are a few tips:

BUY SOME HEADPHONES

We are not joking!

Noise canceling headphones have saved our work and our sanity. Spend the money on them.

HAVE A JOINT CALENDAR

Having a joint digital calendar keeps each of us in the loop as to scheduled phone calls, classes, etc.

Even bike rides.

SCHEDULE TIME AWAY FROM EACH OTHER

Even if it is only a run for groceries while the other one is doing conference calls, or biking while the other is doing concentrated work.

STOP FOR LUNCH AND WEEKENDS

We stop for lunch (usually) and diligently keep from scheduling work on the weekends.

This is our tourist time, our downtime and our get-ready-to-travel time.

And we really like to eat.

BE GRATEFUL AND SPONTANEOUS

Don't forget to say thank you to your spouse. Especially about work stuff. We often forget they have unique and special skills that need to be appreciated too.

And decide stuff on a whim sometimes; keeps your life interesting!
